Checklist: Your First Independent Project

Project rejected without review

- The project is sent for review without any changes to the code from the starter kit.

- There are one or more missing files in the project.

Project requirements

General

- The block structure from the brief is followed. All blocks display correctly in Google Chrome or Firefox.

- There is no horizontal scrollbar on desktop resolutions. Make sure the content width is specified correctly.

- Custom images are located in the separate `images/` folder.

HTML

- The layout matches the brief. The values of `margin` and `padding` properties may differ from the brief by no more than `30px`.

- Negative values of `margin` and `padding` are not used.

- `<div>` is not used for text elements. `<h1>` - `<h6>` are used for headings and `<p>` is used for paragraphs.

- Semantic `<header>`, `<main>`, and `<footer>` elements are present in the code.

- All card images have an `alt` attribute with a short description of the picture as its value.

CSS

- The width is set for the `content` block according to the design.

- Cards are centered according to the brief.

- The `height` property is not used unnecessarily, i.e. it is only used if specified in the brief.
